

YBASL Program

Scientific Group : YBASL

Day : March 10, 2023

Session 1: -omics technology and big datasets in liver disease

Moderators : Rita Manco (UCL), Lena Smets (KUL)

14:00 Metabolomics studies in the context of liver disease.
Lynn Vanhaecke (Ghent University)

14:30 Spatial transcriptomics in the context of liver disease.
Neil Henderson (Glasgow, UK)

15:00 The ethics of big data management in medicine.
Mahsa Shabani (Ghent University)

15:30-16:00 Coffee Break

Session 2: A behind-the-scenes view on key papers from 2021

Moderators : Antonella Putignano (ULB), Jonathan Mertens (UA)

16:00 Best basic paper of 2021 at the 2022 BASL winter meeting:
Bile acids contribute to the development of non-alcoholic steatohepatitis in mice.
Justine Gillard (UC Louvain)

16:30 A Randomized, Controlled Trial of the Pan-PPAR Agonist Lanifibranor in NASH.
Sven Francque (UZ Antwerp)

17:00 End of the Session
